

The Sync Software leverages your current network or Wi-Fi infrastructure providing synchronization and automatic daylight savings time updates. The software displays status of each clock along with additional diagnostic information.

Features:

- On Line / Off Line Clock Status
- Battery Level Information
- Ability to Name Clocks
- Multiple NTP Time Source Selections
- Supports WIFI & POE Clocks
- Count Down Scheduling for Digital Clocks
- Windows Based Software
- Wi-Fi (IEEE 802.11 b/g/n) 2.4 GHz
- WEP, WPA, WPA2
- PoE (IEEE 802.3af)
- External NTP servers use Port 123
- No Re-occurring Fees

Part Numbers:

Sync Software
Part # 7962SOF

IP Clock Sync Software V 0.5.4
